

JET REPORTS 23.2

WHAT'S NEW?

PERFORMANCE IMPROVEMENTS AND USER EXPERIENCE ENHANCEMENTS

We are pleased to announce the availability of Jet Reports version 23.2, which continues the delivery of performance improvements and UX enhancements, driving faster report run times and providing a smoother installation process.

Highlights include:

- Cache Tables Enhancements
- Updated Installer UI

Performance Improvements

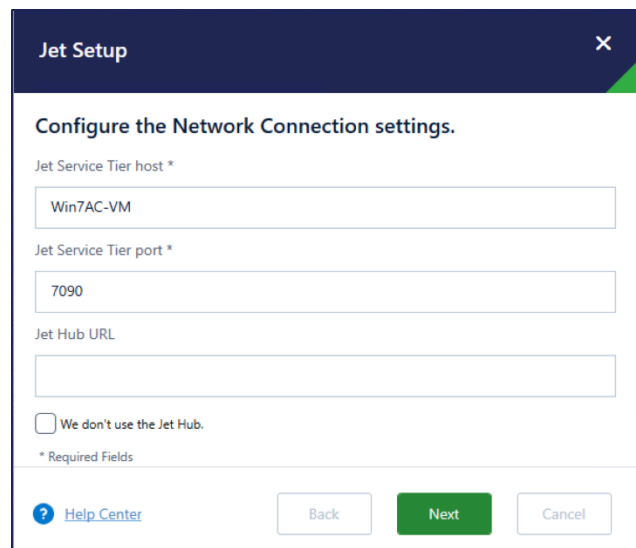

➤ Cache Tables Optimization

Delivering improved performance and faster report run times, cache tables optimization will now be turned on by default for Jet Reports users. With this feature enabled, complex reports see an average of 70% faster run times based on internal testing.

User Experience Enhancements

➤ Installer UI Updates

The Jet Reports installer screen UI has been updated to provide a cleaner, more modern look and feel, delivering a more intuitive user experience.

The screenshot shows the 'Jet Setup' window with the following configuration options:

- Jet Service Tier host ***: Win7AC-VM
- Jet Service Tier port ***: 7090
- Jet Hub URL**: (empty field)
- We don't use the Jet Hub.
- * Required Fields
- Buttons: [Help Center](#), Back, Next, Cancel

Essential Enhancements

> **Critical Issues Fixed**

To provide a better user experience and greater customer satisfaction, Jet Reports 23.2 resolved many reporting use case issues, allowing increased coverage of the cache table optimizations.
