

JET REPORTS 22.2

WHAT'S NEW?

UPGRADED SECURITY, ENHANCED USABILITY, AND ESSENTIAL ENHANCEMENTS

We are pleased to announce the availability of Jet Reports version 22.2, which includes improved security, and better usability.

Highlights include:

- Updated Microsoft Office Compatibility
- Upgraded Security
- Enhanced Usability
- Essential Enhancements

Jet Reports Updated Office Compatibility

➤ Microsoft Office 2021 Compatibility

To ensure that Jet Reports users benefit from the latest enhancements to Microsoft Excel, Jet Reports is now fully compatible with Microsoft Office 2021.

Upgraded Security and Authentication

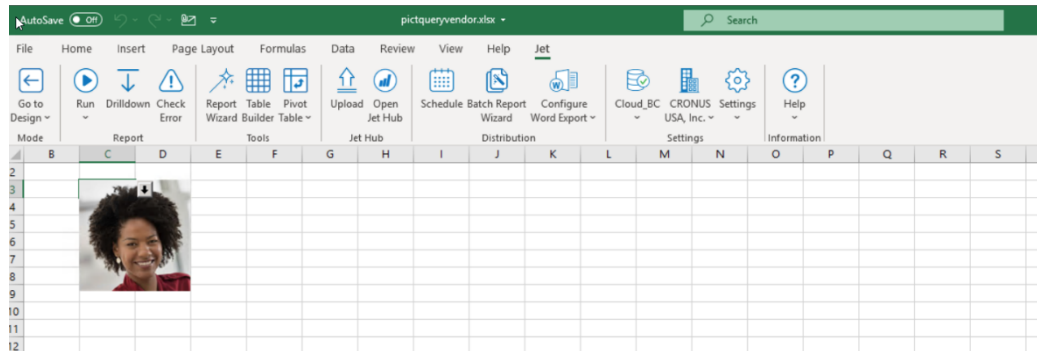

➤ Jet Scheduler Improved Security

To ensure that all Jet components offer a minimal data security risk, Jet Scheduler has been updated with more secure keylogging logic.

Enhanced Usability

➤ Support For Exporting Blob Fields

To provide Dynamics 365 Business Central Public Cloud users additional options for exporting data, Jet Reports now supports export of "BinaryText" and "Picture" blob fields.

➤ Extensible ENUM Filtering

To provide Dynamics 365 Business Central Public Cloud users additional options for filtering data sources, Jet Reports will now also filter on Extensible ENUMs.

➤ D365 F&SCM Connector Token Refresh

To enhance usability for users of Jet Reports with Microsoft Dynamics 365 Finance and Supply Chain Management, the connection will now automatically refresh the user's token after an extended time period of no activity, eliminating the need to manually refresh the connection.

Essential Enhancements

➤ Critical Issues Fixed

Jet Reports version 22.2 has a strong focus on release quality and addressed many customer-reported issues to provide a better user experience and greater customer satisfaction.

- Corrected an issue where in some cases Excel was crashing when a user attempted to drag and drop tables/fields from the Jet Browser.
- Corrected an issue where in some cases TableCaching would not return correct results.
- Corrected an issue where in some cases users with a BC SaaS data source were receiving an error when the NL first references an NF function in its filter.
- Corrected an issue where in some cases Excel would crash and re-load when using the drop downs in the Report Wizard.
